

# VIVREAU Top 50/85

## Diverse environments. One water dispenser solution.

Places, people and needs vary. But excellent water quality is always a must. With this in mind, BRITA developed an outstanding answer to diverse scenarios: the new BRITA VIVREAU Top range, including the models Top 50 and Top 85.

These versatile, mains-fed water dispensers are the latest evolution of the best-selling BRITA Sodamaster range. And like all BRITA products, they unite premium design with powerful filtration technology.

BRITA VIVREAU Top is all about flexibility. There are medium (50 l/h) and high (85 l/h) capacity versions. They can be deployed as countertop units, or as floorstanding models with a customisable base cabinet. Plus, there is a choice of hygiene features. BRITA's advanced ThermalGate™, that thermally disinfects the tap, is supplied as standard. And for environments where an extra level of safety is essential, there is an optional BRITA HygienePlus solution available for all models.

Opt for clean.  
Opt for green.

At BRITA we have always cared about the environment. Our philosophy is to provide the best quality water from the most local source, eliminating the need for costly and polluting transportation and packaging. The installation of a BRITA water dispenser has an immediate impact on your ecological footprint.

NEW

## The benefits to you

- Up-to-date design and durable high-quality materials, e.g. stainless steel; available as a countertop or floorstanding model
- Improved cooling capacity, tailored to medium to high consumption needs
- Powerful thermal-disinfection feature ThermalGate™ supplied as standard
- Optional BRITA HygienePlus solution for even greater safety
- Focus on sustainability: R290 natural refrigerant and extremely low power consumption
- Intuitive displays for selecting water type and portion size, and for adjusting settings
- A choice of four types of great-tasting BRITA-filtered water
- One-stop solution: BRITA service engineers install the system, replace filters and provide maintenance
- The food-grade quality and safety of BRITA water filter products are tested and verified by independent institutions

## Hygiene concept

The BRITA VIVREAU Top range includes BRITA's powerful **ThermalGate™** as standard. This feature thermally disinfects the tap to protect against contamination from external sources. It heats up at regular intervals, keeping the unit clean – even during periods of inactivity, e.g. on holidays and weekends.

For scenarios where exceptional hygiene is vital, the optional **BRITA HygienePlus** is available. This feature comprises three elements: a **BRITA CLARITY Protect 100** inlet filter, a downstream **BRITA CLARITY Safe X3** bacterial filter, and **ThermalGate™**. Together, they reliably remove 99.99999% of bacteria, meeting the requirements of hygiene-sensitive environments (testing procedure is based on ASTM F838, an international recognised standard in the medical technology field).

## Corresponding accessories

BRITA bottles are the perfect match for the BRITA VIVREAU Top range. They are available in multiple shapes, sizes and colours, and in glass or a fracture-resistant BPA-free plastic. In addition, the bottles – as well as the accessory base cabinet for floorstanding models – can all be customised, e.g. with a logo, image or slogan to strengthen corporate identity or raise brand awareness.
